

Hope and Love Shine Through Family Support for Addiction Recovery

Kaohsiung Drug Abuser Treatment Center, in collaboration with Kaohsiung Municipal Kai-Syuan Psychiatric Hospital, continues to provide family support services for individuals struggling with addiction. Since 2022, the partnership has strengthened family bonds through counseling, family days, and reunion events, aiming to reduce relapse and support reintegration into society.

During reunion gatherings, the hospital's social workers and addiction team bring warmth and encouragement, helping families reconnect and heal. Though challenges remain, both institutions remain committed to walking alongside families, proving that with hope comes light and love.
